March 11, 2009

There is strong demand for seedlings for 2009. Inventories change daily. Please call for current availability.

Metric conversion 2.54 centimeters = 1 inch, examples 15-30cm = 6-12", 25-45cm = 10-18"

Our bare root seedlings are available for planting from mid April to early May when soil conditions are ideal for planting. Weather and soil conditions influence when we are able to start our harvesting operations. Contact us for species availability and pricing for fall planting.

Prices are subject to change without notice. Prices do not include PST, GST, shipping or order packaging charge. All prices are F.O.B. the nursery. Due to the high cost of preparing small orders, our minimum order is 100 trees. The minimum order for each variety and size is 50. Quantity price breaks are based on the quantities of each species and size and not the quantity of the entire order.

Prices in effect until May 22, 2009. Contact us for your fall price list. Items on this price list are those commonly grown by Somerville Seedlings. We will continually expand our product line as new plant material comes to our attention, and we welcome your suggestions.
